

PROJECT MANAGEMENT – Training Programs

“The practice of Project Management will be the activity that makes or breaks many global companies in this economic environment “

says Rich Karlgaard –Forbes Leadership Meeting.

- Project Management to-day is indispensable for business results -no longer an accidental profession
- It has matured to a **competency** that needs a **specific skill set** to be taught, and technical personnel handling projects needs to be trained for this .
- **Project management Body of Knowledge (PMBok)** developed by PMI now in its **Sixth edition** is a global standard for best practices in project management .
- The full workshop provides the preparatory course for the certification examinations like **PMP and CAPM** conducted by PMI, **where credential holders are listed in an on-line registry for ready reference, provide a global recognition.**
- Students undertaking these programs get a career advantage as they are already prepared for the Project Environment at the workplace .

Don't let your Projects Become

HERITAGE ITEMS !
